

# Custom Reconnaissance Paddles

## by Winnebago Paddles

**Standard Package (\$200):** Our standard custom order package encompasses the majority paddle designs throughout our website. If you like the wood coloration of one paddle, but the design of another, we can easily swap and make something that best suits your needs. Here are just a few samples that would be included in this package:

**Premium Package (\$225):** Design styles involving added complexity or expensive wood species are included within our premium custom order package (some restrictions may apply). Some examples are:

Don't let these designs limit you; we love challenges and are willing to try anything! Check out our [GALLERY](#) and [ARCHIVES](#) for other ideas!

**Blade Type:** Here are four blade types we routinely do for recon paddles. If you're interested in something else, we'd be more than happy to accommodate other shapes/styles based on your requests.

**BEAVERTAIL**

**WINNEBAGO**

**SUGAR ISLAND**

**SQUARED**

**Grip Type:** Here are three grip types we routinely do for recon paddles. The shield and spade grips add \$25 to the total cost. We can also do other 2D and 3D options using our CNC engraver.

**STANDARD**

**SHIELD**

**SPADE**

**Finishing:** We can do a number of different finishes, but we highlight two as our primary options.

**Natural:** This finish highlights the raw beauty of the wood. While this finish lacks the shine of a gloss paddle, you'll appreciate the natural softness in the wood. The process for these paddles is several coats of a combination of varnish, boiled linseed oil, and mineral spirits.

**High Gloss:** The Mercedes Benz of finishes – literally (we apply the same polish used in Mercedes plants in Germany)! This is our go to finish for most of the paddles on our site because it offers a great combination of strength, function, and beauty. This process uses a shellac base coat, followed by several coats of varnish. To top it off, we use a progression of silicon carbide polishing pads (up to 4000 grit) and imported polish to obtain a deep, rich, and blemish-free gloss that has no equal!

### **Add-on Features:**

**Laser Engraving (\$50+/paddle):** Initials, names, and images can be burned right on to your paddle with our laser engraver. Prices vary depending on complexity.

**CNC Engraving (\$50+/paddle):** Pictures and artwork can also be carved directly into a paddle using our highly detailed rotary engraver. Prices vary depending on complexity.

**Rush Delivery (\$50/paddle):** Need your paddle(s) quick? Move to the front of our queue and get your paddles in as little as two weeks.

**Blueprints:** We often make blueprints when working with our customers on designs. Sometimes a customer knows exactly what they want and a blueprint isn't necessary, but if you want to get an idea of how your paddle will come to life, we are happy to help! Here's an example:

## Wood Options:

This list isn't all inclusive, but it would be the majority that we can acquire and use. As noted below, some woods would increase the cost of a design, but most are generally included in our standard package. You can follow the links for more information about the woods.
